## Performance with no ifs and buts

Benefit from the highest level of expertise, quality and first-class service – for your market success and sustained increase in added value. Three concepts are at the heart of our promise:

### Stability

We have served customers for over 40 years, providing planning reliability and product availability. As a stable family-owned company, we have a strong focus on stability and future developments when making business decisions – both internally and externally.

### Performance

PPM is synonymous with 'Made in Germany' quality, be it for high-performance masterbatch products, cable-compounds or when outsourcing your production capacities. We always provide advice and support, shoulder to shoulder, with passion and a focus on long-term partnerships.

### Proximity

We supply customers in over 70 countries around the world, always at short notice with reliable outcomes. We are close to our customers, tailoring our approach to the task at hand to deliver optimal cost-effectiveness. Professional and at your side to offer advice and support.

\* BAM – *Bundesanstalt für Materialforschung und -prüfung* (Federal Institute for Materials Research and Testing)

## Quality in series – PPM white masterbatch

Do not make any compromises. Rely on top quality from PPM – whether your first concern is quality or quantity. We always offer ideal value for money when it comes to the production of films, blown bottles, injection-moulded products and profile extrusions as well as paper coatings, UV-resistant solutions for silage stretch film, pigment filler mixtures for standard applications and much more.

## Tailored to every application – PPM black masterbatch

We tailor black masterbatch formulations to the specific needs of each application profile. Our affordable solutions also meet the most stringent test standards. For example these include BAM\*-approved qualities required in the production of plastic geomembranes.

## For every nuance in the world – PPM colour masterbatch

From apple green and sea blue to raspberry red, our colour masterbatch specialists offer an impressive range of 13,000 colour formulations. If you are unable to find what you are looking for, however, a qualified and flexible team can work quickly and reliably to develop the optimal colour solution.

*Trust us. We perform.*

Our greatest  
challenge is yours.

Masterbatch | Cable Compound | Subcontracting

PPM pigment concentrates conform to the highest standards in terms of colour fastness, coverage, heat stability and UV resistance. Any individual colour requirements can be met with a minimal lead time. We can supply large volumes as well as samples and small quantities at short notice.

### Specialists in added value – PolyPlus® additives

Do you have the highest demands when it comes to the look, feel and other properties of your products, even with high a output volume? Our additives add specific qualities, making your produces antistatic, UV stable, low friction or flame retardant, for example. Such added value increases the functionality and usability of your end product.

With our range, you will be in safe hands:

- † Anti-block agents
- † Slip agents
- † Anti-fogging agents
- † Flame retardants
- † UV stabilisers
- † Thermo stabilisers
- † Processing aids
- † Purge compound
- † Antistatic agents
- † Fillers
- † ... and much more

### Those who make cables know and value PolyCable®

Thanks to many years of experience, we have a very wide selection of products that cover the various applications and needs of the cable industry. Our product range includes HFFR and other polyolefin compounds such as PP and TPE-O.

PVC compounds round off the catalogue. Products known under the Decelith® brand are manufactured by our subsidiary PCW in Eilenburg, Saxony.

### Your extended workbench – PPM subcontracting

Concentrate on your core business and allow us to take care of the necessary production capacity. Benefit from state-of-the-art technology for a wide range of applications. Everything conforms to the highest international quality standards.

**Make your challenge our own. We are not only satisfied when the product itself has been perfected. Fast and reliable availability, maximum economic efficiency and the best processing properties – these are our goals.**

## Trust and passion

Our thinking is guided by a strong sense of partnership and customer orientation. This determines our actions and the direction of the company. We believe in giving our customers the scope to create a vision with first-class products and a comprehensive knowledge of the market.

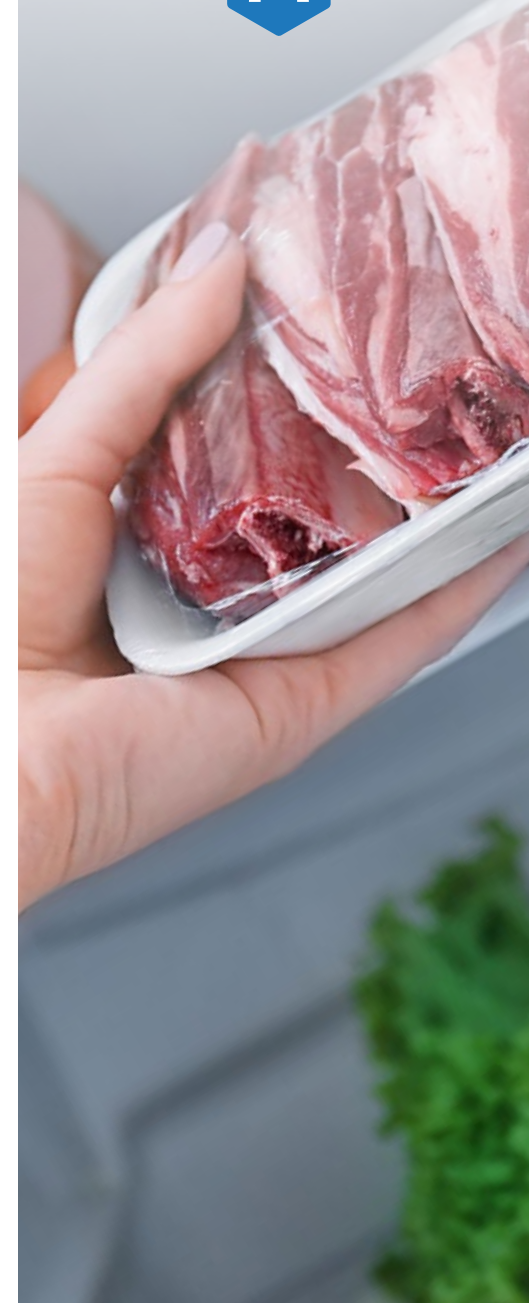

The main pillars of our company are a state-of-the-art technology park, a superior quality management system that has been certified according to DIN EN ISO 9001 since 1991, an environmental management system in line with ISO 14001 and a systematic energy management system in line with ISO 50001 combined with a comprehensive service package. Sustained shared success, reliability, sustainable business and stable growth are key goals for the future. We have set these targets and feel committed to achieving them.

## Your reliable partner – and that's a promise

The PPM brand has stood for high reliability and product quality since 1981. Our mission is to act as a strategic partner on behalf of our customers. We see ourselves as a driving force and partner in development, and we aim to contribute to your financial success.

Through long-term investments and a sustainable approach, we can offer the security you are looking for. Products of consistently high quality are a matter of course for us, as are flexibility, production reliability and a guaranteed flow of raw materials.

**We are there for you in person – whenever and wherever you need us.**

## Our most important challenge is your **satisfaction**

Our target markets are diverse and place high demands on us as well as our products. That is why PPM offers a comprehensive range of products and services. From tailored product solutions with a close focus on customer needs to individualised mass production, we can provide the right solution to meet your every need.

Thanks to our versatile systems and technology, we are able to meet even the most demanding application and product requirements. We can handle quantity and quality – be it standard types in large batches or tailored solutions for an individual customer. Your satisfaction is always our top priority.

**When it comes to choosing the right product, we can offer support and advice.**

## We are **at your side** – from day one

We can help you to increase productivity and make your production more economical. Our technical service team is familiar with the systems and production processes of our customers and understands the effect of our products on individual production steps as well as their processing features and the impact on end products.

## **Reliable processes** from start to end

Robust systems and high production capacity guarantee continuous adherence to deadlines, even when demand is strong. Thanks to reliable resource management, the production process always runs smoothly at PPM.

**Place your trust in us – we are well equipped for our future together.**
